SUMMARY

UI/UX designer and frontend developer with a passion for interfaces that are clear, fast and enjoyable to use. I design every product in Figma first, then build it myself in Next.js, TypeScript and Tailwind CSS, and I know the backend well enough to build the API and database behind it in ASP.NET Core, SQL Server or Supabase. Designed the full interface of Mentoro, a mentorship platform; built and launched the Sublime+ company website; and taught Human-Computer Interaction at Pharos University. Seven projects live online. Looking for a UI/UX or frontend role where design and code meet.

SKILLS

Design: Figma, UI design, UX design, wireframing, prototyping, responsive and mobile-first design, right-to-left (Arabic) interfaces, usability principles

Frontend: Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Framer Motion, Flutter, technical SEO

Backend knowledge: C#, ASP.NET Core Web API, REST APIs, JWT authentication, Entity Framework Core, SQL Server, PostgreSQL (Supabase, row-level security), MongoDB, Prisma

Tools: Git, GitHub, GitHub Actions, Vercel, Cloudflare, Vitest, Google Analytics, Google Search Console

EXPERIENCE

Full Stack Developer

Aug 2026 – Present

Sublime+ (AI-powered marketing and content agency)

- Designed and built the company website, sublime-plus.com, in Next.js, TypeScript and Tailwind CSS, with Framer Motion animations and a fully responsive layout.
- Built a simple blog editor so non-technical teammates can write and publish posts themselves; each post is saved to GitHub and the site redeploys automatically.
- Set up technical SEO (sitemap, structured data, Open Graph images), Google Search Console, Google Analytics and Cal.com meeting booking.

Teaching Assistant

Nov 2025 – Sep 2026

Pharos University, Alexandria

- Taught Human-Computer Interaction: usability principles and interface design, with lab work in Figma and Flutter.
- Taught practical lab sessions for Programming 1, System Programming and Compiler Design (CS 404).
- Prepared lab materials and gave students feedback on their designs and code.

Data Entry & Client Information Technician (Summer)

Jun 2025 – Aug 2025

KOP Coach, USA (remote)

- Entered, updated and validated client records in company systems, correcting errors to keep data reliable for the team.

Backend .NET Developer Intern

Jul 2024 – Nov 2024

Route

- Built an e-commerce REST API in ASP.NET Web API and an ASP.NET MVC web application, with SQL Server, Entity Framework and LINQ.

Robotics Intern

Jun 2023 – Aug 2023

ST Smart

- Built embedded projects on Arduino and ESP32: a GSM-alert home security system, a Wi-Fi/Bluetooth-controlled car and a secured safe.

PROJECTS

Mentoro: Mentor/Mentee Web Platform (Graduation Project)

2025

Figma, Next.js, TypeScript, Tailwind CSS, SignalR | mentoro2.vercel.app

- Designed the complete UI/UX in Figma before development, covering every screen of the separate student, mentor and admin dashboards.
- Designed for Arabic and English from the start, with right-to-left layouts.
- Built the home page, user profiles and mentor-mentee connections in Next.js and TypeScript, as one of two frontend developers in a 6-person team.

CareChart: Electronic Health Record	2026
Next.js, TypeScript, Zod, Vitest, Tailwind CSS carechart-ehr.vercel.app	
- Designed and built a patient record app for a small clinic: allergies, problems, medications, vitals and SOAP visit notes. - Designed safety cues so critical details stand out: a severe-allergy banner and automatic flags for fever, abnormal heart rate and high blood pressure. - Drew an accessible blood-pressure trend chart in SVG; validated every form with one shared Zod schema; 25 unit tests in CI.	
Magnetiq: Photo-Magnet E-commerce Store	2026
Next.js, TypeScript, Prisma, MongoDB magnetiq-freelancer12.vercel.app	
- Designed and built an online store for a custom photo-magnet business in Egypt; customers upload a photo and see a live magnet-shaped preview before ordering. - Designed a short checkout with guest checkout, coupons, Cash on Delivery, InstaPay and a pre-filled WhatsApp order message. - Built an admin dashboard for orders, products, bundles, offers and coupons.	
Nour HR: Pharmacy HR System	2026
Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS hr-pharmacy-nine.vercel.app	
- Designed and built a bilingual (Arabic/English, right-to-left) HR system for a multi-branch pharmacy: employees, schedules, attendance, payroll and evaluations. - Designed request-and-approval flows for holidays, overtime, salary advances and resignations, with different views for admins, HR, area managers and staff. - Backed it with a 25-table PostgreSQL schema and row-level security on every table (53 policies).	
Shop API: E-commerce REST API	2026
C#, ASP.NET Core 8, Entity Framework Core, SQL Server, xUnit github.com/MayarIssa/shop-api	
- Built a REST API for an online store: product catalog with search, filters and paging; cart; checkout; and order management. - Secured it with JWT authentication, hashed passwords and role-based access for customers and admins. - Made checkout transactional, so stock is reduced and the cart emptied together or not at all; xUnit integration tests run in GitHub Actions.	
BuildFin: Building Finance Manager	Sep 2026 – Present
Next.js, TypeScript, MongoDB Atlas, Vercel building11.vercel.app	
Designed and built a mobile-first app that lets a building owner record each resident's payments and expenses (electricity, water, elevator) and see monthly totals at a glance.	
Other projects: Breast cancer diagnosis with Python, scikit-learn and Power BI (Random Forest 95.6% accuracy, team of 3, 2025); Smart Safe on ESP32 with Blynk (team of 5, 2024); Smart Pet Feeder on ATmega32 in C++ (2025); Maze Chase, a Pac-Man-style game in C# Windows Forms (2024). Details at mayar-issa.vercel.app .	

EDUCATION

Bachelor of Computer Science	Oct 2021 – Jul 2025
Faculty of Computer Science and Artificial Intelligence, Pharos University, Alexandria GPA 3.76	

CERTIFICATIONS

- Cisco Networking Academy (Skills Plus Egypt), 2025: CCNA Introduction to Networks; CCNA Switching, Routing, and Wireless Essentials; CCNA Enterprise Networking, Security, and Automation
- Back-end (.NET Core) Diploma, Route IT Training Center, Oct 2024
- Robotics with AI Summer Program (50 hours), ST Smart, Jul 2023
- innovEgypt Program (45 hours), ITIDA and TIEC, Aug 2022

AWARDS & COMPETITIONS

- Honorable Mention, 2023 ICPC Egyptian Collegiate Programming Contest (ECPC) Qualifications, team of 3; competed again in 2024
- Participant, AUF (Agence Universitaire de la Francophonie) Regional AI Hackathon, Mar 2023: AI startup for medical diagnosis

LANGUAGES

Arabic (native), English (highly proficient)
